PRELIMINARY ABSTRACT OF RAILWAY STATISTICS FOR THE YEAR ENDED DECEMBER 31, 1946

INTRODUCTORY STATEMENT

This preliminary abstract for the calendar year 1946 is the thirty-sixth in the series and is compiled from the annual reports of class I line-haul railways, class I switching and terminal companies, the Railway Express Agency, Inc., and the Pullman Company. It is intended primarily to make available as promptly as possible certain totals not obtainable from the monthly or quarterly reports of carriers. The totals are subject to change after corrections in the annual reports have been authorized. The final totals will appear in the Statistics of Railways for 1946.

Because a separate annual publication of freight commodity statistics is regularly issued in detail for the individual classes of commodities, only group totals of commodities carried are shown in this preliminary abstract for the year 1946.

It should be especially observed that in Summary No. 1 the balance sheet items relate to companies that file operating reports and do not cover the balance sheets of companies that file lessee reports, the property of which is operated by class I line-haul steam railways; that is, railways having annual operating revenues above \$1,000,000. The following table, however, shows the investment in road and equipment of the operating, lessee, and proprietary companies at the end of the year 1946, in comparison with final figures for the preceding year. The steam railway system at the close of 1946 had a total investment in road and equipment of \$27,277,974,065, which was \$310,218,301 more than the total for 1945. This relates to all classes of line-haul companies. This comparison is without consideration of the increase in the accrued depreciation. At the close of the year 1946 accrued depreciation and amortization of defense projects of class I, II, and III line-haul companies and their lessors amounted to \$5,800,975,045, an increase of \$251,255,512 over the 1945 total. The depreciation accrued on the books in 1942 and prior years is confined chiefly to equipment. Amortization of defense projects in 1941 to 1946, inclusive, applies both to roadway and equipment.

The increase in the investment in road and equipment of class I operating companies shown in this table is \$444,638,418. An increase of \$321,655,086 is shown in Summary No. 1 as being the net expenditures for additions, betterments, and extensions, after retirements for class I operating companies. The difference between these sums is explained by the fact that the 1946 investment accounts of certain railways reflect not merely the net expenditures for property during the year but also changes due to reorganization and other accounting readjustments.

In Summaries 1 and 3, the assignment of revenues to freight service and to passenger and allied services is in accordance with the distributions made by carriers in filling out the schedule relating to revenues in the annual report form. There is no special order giving detailed instructions for the separation of revenues by class of service, however, this is in large part provided for by the regular accounting classifications. The division of expenses between freight service and passenger and allied services is as reported by carriers under the revised rules prescribed by the Interstate Commerce Commission effective January 1, 1936.

The railway tax accruals assignable to freight and to passenger services are stated on page 6 of this abstract as reported by the class I line-haul railways. Many of the carriers did not apportion their tax refund credits (account of 1946 unused excess profits credit carry-back and 1946 net operating loss carry-back) on the basis of the distribution between freight and passenger service in the years to which the refunds were applicable but on the basis of the operation for the current year. If the separation had been made on the former basis, the distribution between freight and passenger service would have been as follows:

Freight service: All districts, \$411,597,749; Eastern district, \$116,953,926; Southern district, \$119,482,168; and Western district, \$175,161,655.
Passenger service: All districts, \$85,298,274; Eastern district, \$33,936,705; Southern district, \$14,453,775; and Western district, \$36,907,794.

The following table shows for class I line-haul steam railways, the total revenues, expenses, net revenues before taxes and rents, the operating ratio, and the net railway operating income for the freight and passenger service separately, for the years 1936 to 1946. Small amounts of revenues and expenses reported as "not related to either freight service or passenger and allied services," are shown in the last two columns.
